Technology leader who connects engineering to business outcomes. Over twenty years across startups, ad-tech at billions of transactions, and regulated banking have shaped how I choose what to build, what not to build, and where to invest, and how I lead teams that decide well today and better tomorrow, always favouring clarity over cleverness and reliability over novelty.

EXPERIENCE

Senior Manager, Macquarie Bank — Sydney · 2024–Present

Lead the team delivering new banking products, reshaping how it builds them and cutting production incidents through testing, observability, graceful degradation, and clearer code.

Senior Software Engineer, Rokt — Sydney · 2019–2024

Built the identity and attribution systems and led bot detection, a real-time service on the critical path of a platform processing billions of transactions.

Senior Data Engineer, SLI Systems — Christchurch · 2017–2019

Migrated core data services to Google Cloud, making them faster and cheaper and strengthening the company's position in its acquisition.

Chief Technology Officer, Ideia Big Data — Brasília · 2014–2017

Hired and led engineering across three offices in three states, from concept to the first production-ready products. Reported strategy to investors and shaped the team structure and career paths that prepared the company for its merger with Pinion.

Co-Founder, Otimicar — Brasília · 2013–2014

Specified and built the first server for a device that turns any car into a smart car, syncing car data with partners and sending maintenance recommendations to owners.

Earlier — 2003–2013

INEP · Ministry of Education · Bancoob · AgênciaClick/Isobar

High-availability public systems (E-MEC, Revalida), credit portfolio transfers, and six years teaching web development.

RESEARCH

Formal Verification of Euclid's Theorem on the Infinitude of Primes

Formal Verification of Sieve Sequence Stages and Their Transitions

Structural Properties and Signed Boundaries of 2-Gaps in Sieve Sequences

Preprints on Zenodo, 2026, with machine-checked proofs.
All articles →

AWARDS

Cannes Lions: Gold, Silver, and Bronze
SAT-JF14 mobile app, built at Adjetiva · 2014

Honourable Mention, Best Published Articles
LACLO · 2015

SKILLS

Leadership
Technical strategy, hiring, people management, investor reporting, distributed teams, career paths

Cloud & delivery
AWS, GCP, Kubernetes, Docker, Terraform, CloudFormation, CI/CD

Data
Spark, Apache Beam, Kafka, BigQuery, Redshift, Postgres, MongoDB, Elasticsearch, Redis

Languages
Scala, Java, Python, Go, JavaScript

Verification
Stainless (Scala), Dafny

EDUCATION

Master's, Biomedical Engineering
Universidade de Brasília · 2013 · four publications

Graduate Degree, Computer Science
Universidade de Brasília · 2008

CERTIFICATIONS

AWS Certified Solutions Architect – Associate
2022–2025

Programming with Google Go
Specialisation · UC Irvine · 2023

Managing Project Risks and Changes
UC Irvine · Coursera · 2020

Also parallel and functional programming in Scala (EPFL), data science and machine learning (Johns Hopkins, Duke, Stanford). All certificates →

LANGUAGES

Portuguese (native), English (fluent)
